Allow yourself to be carried away by its curved lines and its performances that compare to professional heat pumps.

5 times more economical than an electric heater, PICO easily heats up the water of your swimming pool without excessive electrical consumption.

Its high-efficiency Toshiba compressor captures calories from the surrounding air that it transmits to the water in your swimming pool.

Easy to put in service, its standard connectors are compatible with any filtration system.

You just need to plug it into an electrical socket and let it heat up your swimming pool with total peace of mind.

PICO is available in 3 different capacities, from kw 3 to 5, and its R version comprises a reversible mode that can cool off the water.

PICO, it's the ease of an electrical heater with the performances of a Premium heat pump.

The POOLEX : all accessories included

5m electric extension and socket with 10 mA earth leakage protection
